to see the fire burning

# *i am* greater than ever

With the Maestro 75XTU Tall *Eco Wave*, you bring the ultimate fire experience into your home.

The fire in the Maestro 75XTU Tall *Eco Wave* wraps around the logs, the flames have more volume and reach higher than in any other gas fire. The natural colour, texture and detailing of the fire logs create an even more realistic fire experience.

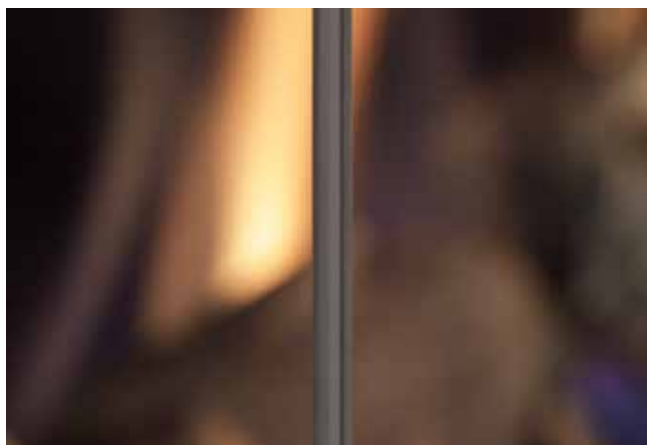

#### Dynamic Flame Burner®

Lively, true-to-life flames built up like a real wood fire. The double burners add height and depth to the fire.

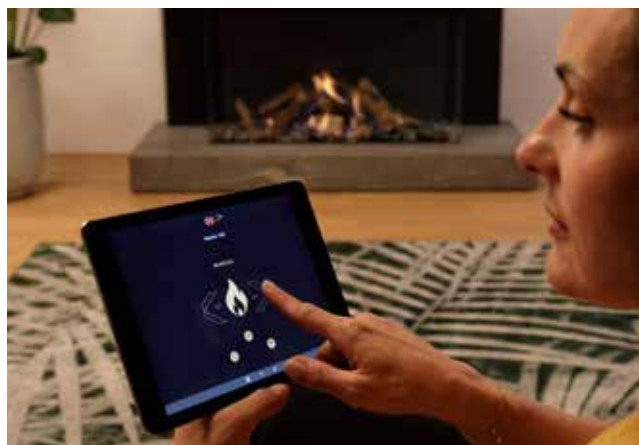

#### Eco Glow

Even more realistic fire due to an atmospheric glow in the burner bed. The glow bed can be operated separately from the flames.

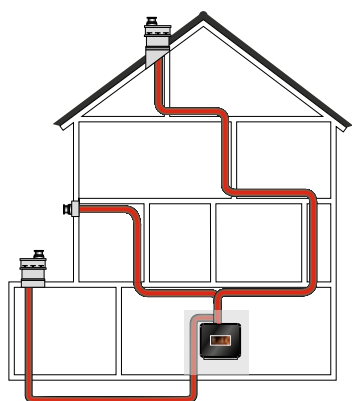

#### GlassFit

A unique pane system where the glass panes fit together perfectly for optimum combustion. Placing the glass seamlessly together creates a full and uninterrupted three-sided fire view.

#### Eco Wave

Continue to enjoy a beautiful flame picture and save up to 50% on energy consumption. With the DRU Eco Wave system you can infinitely regulate the heat output of your fire without compromising on your flame picture.

#### PowerVent®

Thanks to PowerVent®, even when there is little space, you can flue your fireplace up to 30 metres or through all kinds of bends.

#### Control

Control your fire very easily with the remote control that comes as standard. Use our handy free DRU Fire app (via Bluetooth) for full control of your fire.

#### Design & interior

Even when the fireplace is not burning, it is an asset to your room.
